

# ECo-AT

**The Austrian contribution  
to the Cooperative ITS Corridor**

# 3 Countries, 2 Common Use Cases, 1 Specification

**The system specification for Day 1 Use Cases  
was defined and specified.**

**All Day 1 Use Cases of ECo-AT Phase 1  
were defined and specified.**

**Key components have been installed fully  
compliant with ECo-AT system specifications.**

**The specifications have been provided to more than 200 interested stakeholders worldwide.**

**Entirely transparent process during  
all stages of the project**

# Publication of all release documents including multiple iteration discussions

**Feedback included of general public, industry,  
OEMs, C-ITS corridor partners, road operators**

# Roadworks Warning Use Case is harmonised across the C-ITS Corridor.

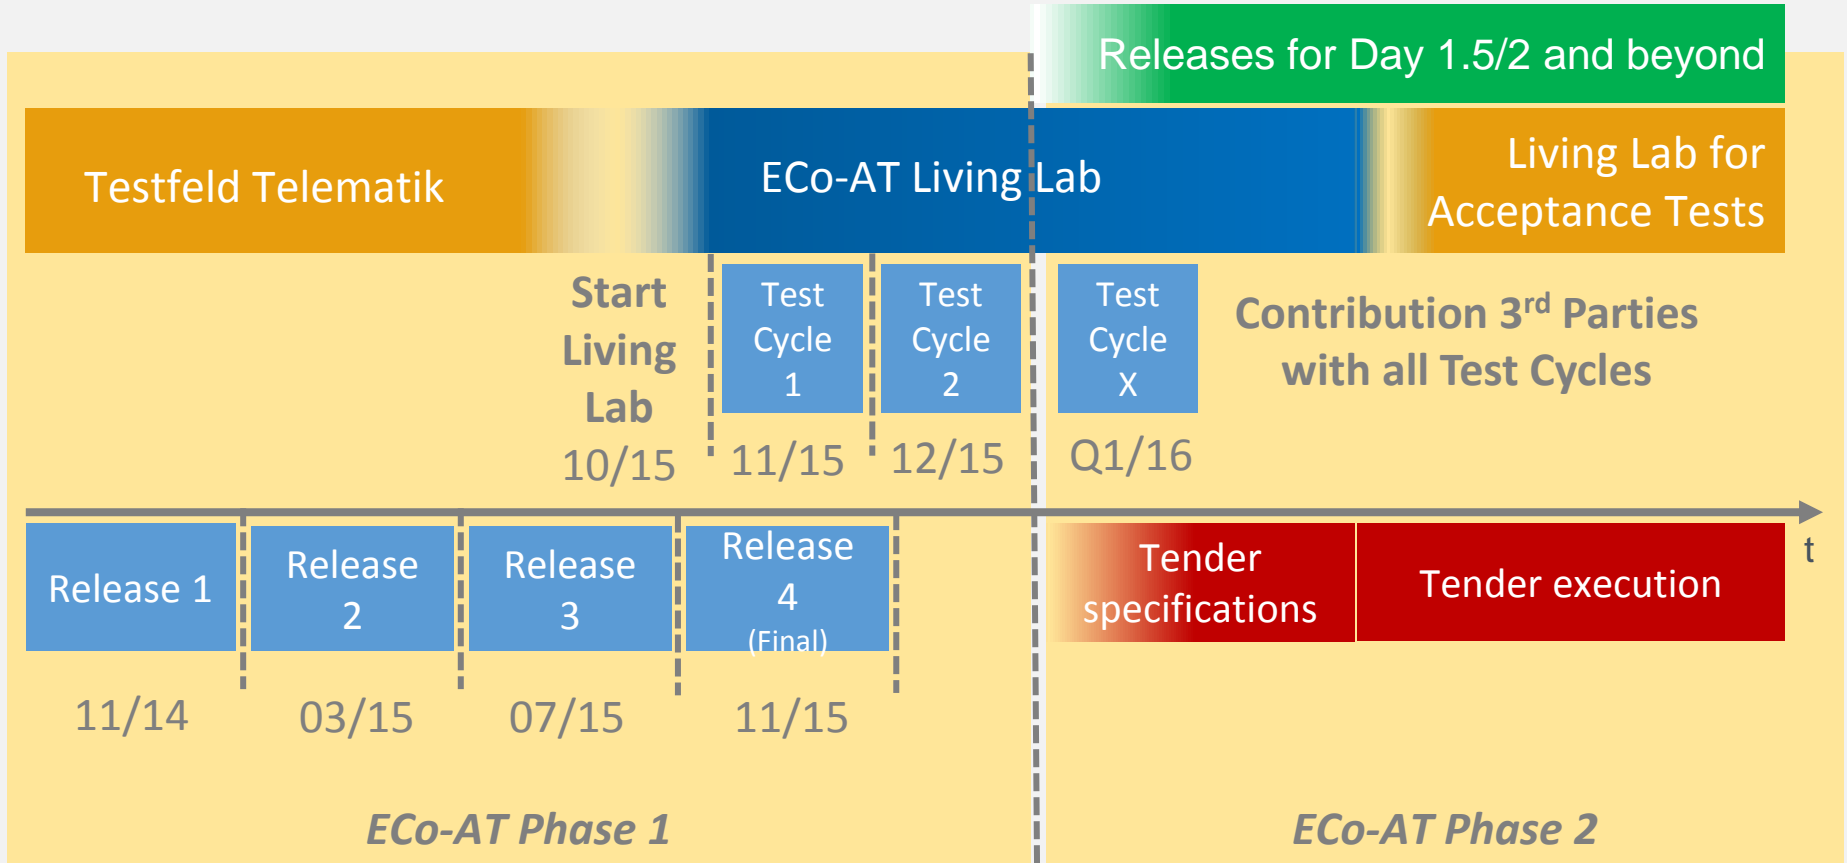

# Probe Vehicle Data Use Case is harmonised across the C-ITS Corridor.

ECo-AT

# The Living Lab will start 1st of October

**The test time schedule is harmonised  
with the C-ITS Corridor partners**

**ECo-AT living lab is open to Third Parties  
in a way and to an extent unique in Europe.**

**Join the ECo-AT Living Laboratory to test  
with us the specified C-ITS services**

**The C-ITS Corridor can serve as a  
workable “Blueprint” for Europe.**
